

A Concepts, techniques and therapeutic methods of Andrew Taylor Still

Richard van Buskirk D.O., Ph.D., F.A.A.O. (USA) June 7, 8, 9 and 10, 2008

PRESENTATION :

Richard van Buskirk D.O. has, over several years, thoroughly researched Andrew T. Still's way of working. He proposes an excellent workshop in learning to work with patients in an efficient manner according to Tradition. This seminar is very useful to easily relieve patients and will allow participants to discover how Andrew Taylor Still practiced Osteopathy.

PROGRAM :

- Concepts and vision of the Human Being according to Andrew T. Still founder of Osteopathy. Practical demonstrations of the methods he used at the fasciae and

joints levels in the different regions and levels.

- Evaluation and treatment of the cervical spine, the ribs and the dorsal spine.
- Evaluation of the lumbar spine, the pelvis, and more specifically, the sacrum.
- Work on the upper and lower extremities, the muscles, ligaments and tendons, and the aponeuroses.
- Methodology to apply Dr Still's techniques.

This workshop is very useful in learning to work efficiently and with ease. It centres on practice and palpation. Each participant will be able to purchase his book which includes detailed pictures on the subject of the workshop

J Evaluation and treatment of the causes of myofascial dysfunctions

Diane Laflamme, D.O. (CA) et Dino Muzzi, D.O. (CA) June 7 and 8, 2008

This workshop is open to all health professionals. An excellent workshop on the Fasciae and a wonderful introduction to discover the efficacy of Osteopathy.

This workshop will be taught by two excellent teachers from the C.E.O. It is very useful in developing palpation skills and learning the different concepts and properties of the fasciae. The therapeutic methods taught during the practice sessions will allow you **to assess and relieve tension in different parts of the musculo-skeletal system, visceral regions and the crano-sacral functional unit (pelvis, shoulder and pelvic girdles, abdomen, etc.)**. This workshop obtained great success last year and is a good preparation for studies in Osteopathy.
